Subject: Application for Senior Software Developer / Senior PHP Developer Position

Dear Hiring Manager,

I am writing to express my interest in a Senior Software Developer / Senior PHP Developer opportunity within your organization. With over 7 years of professional experience in software development, I have worked extensively with PHP, Laravel, CodeIgniter, MySQL, RESTful APIs, and enterprise application development.

Throughout my career, I have been involved in designing, developing, maintaining, and improving scalable web applications and business-critical systems. My experience includes backend development, API integration, database optimization, payment gateway integration, fintech solutions, billing systems, and business process automation.

In my current role as a Senior PHP Developer at SahajMobile, I work on enterprise fintech platforms and contribute to the development and enhancement of solutions used across multiple business teams. Previously, at SSL Wireless and other organizations, I gained experience working on enterprise billing systems, APIs, integrations, and a variety of business applications.

I enjoy solving complex technical problems, improving application performance, writing maintainable code, and working collaboratively with different teams. I am always interested in learning new technologies and finding practical solutions that create real business value.

I have attached my resume for your consideration. I would welcome the opportunity to discuss how my experience and technical skills could contribute to your organization.

Thank you for your time and consideration. I look forward to hearing from you.

Best regards,

Md Shakil Hossen

Senior PHP Developer
